

- Prevent Seizure
- Extend bearing life
- More energy efficient

Calcium Based Grease With EP properties is premium quality Calcium soap based multi functional grease processed from premium quality base oil & chemicals fortified with Extreme Pressure Additives which offers mechanical stability, high load carrying ability and water washout resistivity.

It is recommended for heavy duty plain & roller bearing operating under severe conditions, including shock loading, wet environments and moderate temperatures. Reduces friction & Pressure. Extend bearing life, Increase lubrication intervals, more energy efficient. Water resistant. Prevent seizure.

Effective resistance to centrifuging and oxidation at high service temperature. Excellent choice to simplify stock-control. A high quality smooth textured, lithium base multipurpose grease , designed with highly refined base stocks, lithium complex thickener and balance additive package.
